1. Watch the film and then check your understanding of the key concepts in the film by scrolling down on the page and to the short quiz. *This is an interesting format because it shows the percentage of other people's answers for the questions.*
2. Write a short answer to each of the following questions:
    a. How does China benefit from direct investment in the United States?
    b. How does the United States benefit from China's direct investment?
    c. What negative consequences can direct foreign investment cause for both countries?
    d. How has the bi-directional investment between China and the United States over the past few years differed from investment patterns of the past?
    e. How does China's direct investment relate to United States employment patterns?
    f. How has technology made this type of globalization possible?
    g. What motivates Chinese investment in the United States?
    h. Why has China's economy grown at a faster rate than ours in recent years?
    i. What effect will China's direct investment have on the United States economy in future years? Will this effect be good or bad? For whom?
    j. Should we encourage more countries to follow China's lead and directly invest in the United States? Why or why not?
